EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

3. Claims 1 and 19 are generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 4-6, 10, 18, 22-24, 28, and 36, directed to the species I, III, IV and V, are no longer withdrawn from consideration since all of the claims to these species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic-linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance: the prior art fails to teach, disclose, or suggest, either alone or in combination, a semiconductor assembly comprising a semiconductor substrate attached to a carrier substrate with a plurality of mutually spaced elements disposed in an area of overlapped between a surface of the semiconductor substrate and an opposing surface of the carrier substrate and a plurality of wire bonds extending between the semiconductor substrate and the carrier substrate; and a volume of dielectric filler material disposed between adjacent mutually spaced elements in the area of overlap, wherein:

- a. The semiconductor substrate is attached to the carrier substrate primarily by the volume of the dielectric filler material; or
- b. The dielectric filler material fills a majority of the area of overlap (e.g. the standoff volume).

as instantly claimed, and in combination with the additional limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
